

PlasmaBiotics System

The unique solution for fast drying and active storage of endoscopes

Research shows that to create and maintain an endoscopy's disinfected status, complete drying is an absolute necessity .

As part of its Triple Aim program, PENTAX Medical continues to act for improved hygiene control and reduced infection and patient risk with the PlasmaBiotics System.

The unique and innovative combination for fast drying and active storage:

Perfect drying

PlasmaTYPHOON is designed to reduce the risk of infection by perfectly drying the scopes. Insufficient drying can be a source for microbial contamination and the transmission of infectious material.

Controlled storage

The active storage in PlasmaBAG allows the storage of endoscopes, preserving the disinfection level already achieved. Inadequate storage can be a source of microbial contamination and transmission.

Fully adaptable

The PlasmaBiotics System fulfills your needs by adapting to the number of scopes. It requires only limited working space and can help you to increase hospital efficiency.
