

VALUE OF INTRAOPERATIVE ULTRASOUND FOR TUMOR RESECTION AND ABLATION

We are pleased to invite HPB surgeons from all over the world to our advanced webinar: Value of Intraoperative Ultrasound for Tumor Resection and Ablation. Participants will receive peer-to-peer education on the clinical value of intraoperative ultrasound in HPB procedures, learn about the identification of liver and pancreas sonographic anatomy, and participate in a live Q&A session. Register today!

Date/Time:  March 18, 2021. 12:00 pm – 1:30 pm (CET)
 March 18, 2021. 8:00 pm – 9:30 pm (CET)

Agenda:

- Understanding the clinical value of intraoperative ultrasound in HPB surgical procedures
- Identification of normal hepatic and pancreatic sonographic anatomy
- Identification of common surgical pathologies of the liver and pancreas
- Use of intraoperative ultrasound in targeting lesions for resection or ablation procedures
- Q&A

Clinical Lecturer:  **Dr. Robert C.G. Martin, II, MD, PhD, FACS**
Director, Division of Surgical Oncology, Professor of Surgery, University of Louisville, Louisville, KY
